GIVE SIGHT.
CHANGE LIVES.

ANNUAL REPORT 2023

2023
A YEAR OF GROWTH & STABILITY

Last year at this time we shared with you that OGS's then-interim executive director Lois Schoenbrun had accepted the position permanently. And, in Lois we did, indeed, find the right person to lead our organization forward. Under Lois's direction, we continued during 2023 to strengthen OGS so that the important work we do will impact the world well into the future.

The work done by our grantees and partner organizations was significant during 2023. Due to the continued generosity of our donors, OGS awarded 21 grants totaling more than $930,000 for optometry training and vision care projects throughout the world. That brings the total number of grants awarded by OGS during the last 20 years to 199!

We were pleased to welcome two new members to the OGS Board of Directors, both of whom are highly regarded in the industry and profession. Daniel McBride, JD, executive vice president and chief operating officer of CooperCompanies, and Meng Meng Xu, OD, MPH, FAAO. Both joined us in October. We are delighted to add their considerable experience and insight to the board.

We also welcomed two new OGS staff members this year to positions vital to our growth. Nikki Earich joined OGS as Director of Development. And Sarah Burtner was hired to fill the newly created Director of Communications position. Both have extensive experience in their respective fields and, working with the rest of the OGS staff and board, have already made significant positive contributions to our work.

We selected FluoreSCENE Media as our official social media partner to help expand OGS's reach with eye care professionals as its charity of choice. FluoreSCENE Media is home to the eye care industry's online conversation with its flagship media community, ODs on Facebook, engaging more than 46,000 eye care professionals.

FluoreSCENE Media also reaches an audience of tens of thousands via LinkedIn, Instagram, and Twitter, providing community, career, and educational resources. This partnership provides us with a unique opportunity to connect with eye care professionals.

As part of a comprehensive strategic planning session held early in the year, the Board and staff revised the OGS vision and mission statements, bringing the language in line with that of the World Health Organization, and highlighting our commitment to expanding the optometry profession globally in order to eradicate preventable blindness and vision impairment around the world. As Optometry's Charity we remain committed to the sustainability of projects we support by addressing the severe shortage of optometry professionals in developing countries and integrating comprehensive vision care into the health care systems of countries in which we work.

Last year we mentioned that, during 2023, we would continue to improve the grant application and review process. Those efforts proved fruitful during the application vetting period. We implemented a pre-application step to allow us to efficiently determine which potential partner projects meet our criteria and which do not. We are already continuing to refine and improve our review process during 2024.

Juan Carlos Aragón OD
Chief Executive Officer
Visioneering Technologies, Inc.

Susan Cooper OD
Chair, Canada
Former President & Managing Director, World Council of Optometry

Thank you,
donors,
for your
generous
support
during 2023

GIVE SIGHT.
CHANGE LIVES.

OPTOMETRY giving sight

OUR VISION
FOR GIVING SIGHT

A world in which optometry enables universal access to vision care and eye health.

OUR MISSION
FOR GIVING SIGHT

Optometry Giving Sight supports sustainable and scalable optometry-led programs that educate eye care providers locally and enable the establishment and delivery of vision care and eye health to all.

OUR HISTORY OF GIVING SIGHT

In 2003, three international eye health organizations began an initiative to end preventable vision impairment and blindness globally due to refractive error. The World Council of Optometry, the International Agency for the Prevention of Blindness, and the Brien Holden Foundation worked together to establish Optometry Giving Sight (OGS), a non-profit organization whose goal was to raise money from the optometry community to fund projects around the world where the need for eye care is the greatest.

Although now fully independent, OGS continues to operate with the vision of its three founders. Optometry Giving Sight…

- Is Optometry's Charity™
- Raises funds from the optometry community to support the eradication of prevent-able blindness and vision impairment due to uncorrected refractive error
- Focuses on sustainable, long-term solutions by expanding the optometry profession in areas where there is little to no access to eye care
- Strives to integrate comprehensive vision care into the health care systems of countries in which it works

During the last 20 years, OGS has…

- Awarded more than 199 grants for primary eye care services to more than 8 million people
- Funded the training of more than 14,000 optometrists and eye care personnel
- Established more than 130 vision centers in underserved areas
- Served individuals of all ages in more than 47 countries
- Funded the building of 14 optometry schools in areas of need

WORLD SIGHT DAY CHALLENGE

GIVE SIGHT. **CHANGE LIVES.**

All around the world.

Thank you to all our donors
for helping us make an impact.

WITH THE GENEROUS SUPPORT OF OUR DONORS THIS YEAR…

Optometry Giving Sight (OGS) awarded these 2023 grants totaling more than $930,000 to partner organizations in support of self-sustaining initiatives that address preventable vision impairment and blindness for people of all ages around the world. This life-changing work would not be possible without your support.

2023 GRANTS

MOBILE TECHNOLOGY TO IMPROVE PEDIATRIC VISION CARE WORLDWIDE

App Standardizes Care and Collects Vital Data

GRANTEE: Berkeley Vision, Herbert Wertheim School of Optometry and Vision Science

The grant awarded to Berkeley Vision will result in the development of a powerful mobile app which will enable standardized processes and data acquisition for vision screening and eye care for children from ages four to 10. The app will enable all children to be screened in a relatively automated way, with the assistance of minimally trained personnel. It will also provide a standardized approach to prescribing, referral and follow-up care, and will record data for analysis, quality assurance and monitoring compliance.

When completed, the app will be implemented initially at The African Eye Institute and the India Vision Institute. It will ultimately be made freely available to children's vision programs worldwide. An ongoing and sustainable initiative, the project is estimated to eventually benefit 500,000 young people globally.

EXPANDING OPTOMETRY TRAINING IN VIETNAM

New equipment and Clinical Space Will Result in 2,000 Parents Served Monthly

GRANTEE: Brien Holden Foundation

Optometry Giving Sight continues to support a five-year initiative by the Brien Holden Foundation (BHF) to increase the number of credentialed Vietnamese optometrists to serve the country's estimated seven to 10 million individuals whose poor vision significantly

impacts their quality of life. (In 2014, there were only three optometrists – all trained outside of Vietnam – to serve the country's population at that time of 93 million.)

Since that time, BHF, OGS and other partners have supported the establishment of two academic optometry programs – the first at the University of Medicine Pham Ngoc Thach and the second at Ho Chi Minh City Eye Hospital. The grant will be used to replace and purchase equipment for the existing and new academic vision centers (AVC) at the hospital. The AVCs provide optometry students and residents with the clinical experience they need for comprehensive training, while providing vital vision care and services to Vietnamese residents in the area.

The Foundation projects that the purchase of the optometry equipment – and space afforded by the new AVC – will double to 30 the number of students each month who are able to gain the vital clinical competencies needed for their training and education. It is estimated that the project will enable students and graduates to serve approximately 2,000 patients monthly, with 1,000 of them being children.

SEE-CAN PROJECT EXPANDS CLINICAL SPACE

GRANTEE: Canadian Vision Care

In 2008 Optometry Giving Sight (OGS helped support the establishment of the Mzuzu University Optometry Program to begin to address the critical shortage of vision care in Malawi. Since that time, the number of students enrolled in the program has tripled, yet the opportunities for students to gain clinical experience have not kept pace with the growth of the program.

To address the need for additional clinical space, OGS awarded a grant to Canadian Vision Care in 2023 to refurbish Sea Can shipping containers as SEE CAN vision clinics outfitted with the necessary equipment supplies, and training materials for students to provide eye care to residents under the guidance of credentialed optometrists.

The clinics are being shipped to health centers in the country and will benefit approximately 50,000 residents of Malawi. Donations provided to OGS by individual optometrists, optometry practices and businesses within the eye health industry make these grants possible.

MALAWI OPTOMETRY STUDENT NUMBERS TRIPLE

Student Vision Kits Help Fill the Need

GRANTEE: Canadian Vision Care

Malawi's Mzuzu University Optometry Program began in 2014 with support from OGS. Today, there are triple the number of students at the school than when it first opened its doors. Now in its thirteenth year, the program is in need of updated and additional equipment for training.

The grant will allow for the purchase of new, vital equipment and resources to assist students in vision screening protocols. These student kits will include various exam and diagnostic equipment and materials as well as a video about vision screening best practices to maximize their clinical experiences in preparation for becoming optometrists to serve their communities

SCALING UP SCHOOL EYE HEALTH IN LIBERIA

New Program Established for Training Optometric Techs

GRANTEE: EYElliance

With only 10 ophthalmic technicians to serve the 5.4 million citizens of Liberia, there is a vital need to expand the profession. The grant – the second that OGS has provided to EYElliance – will be used to establish a new optometry technician program at the Tubman National Institute of Medical Arts to help sustain its national school eye health program. The aim is to reach 12 of Liberia's 15 counties with school eye health programming to ensure that more than 80 percent of all Liberian children enrolled in public primary and secondary school have access to appropriate eye care. The training program is being established in conjunction with the LV Prasad Eye Institute and the Liberia Ministry of Health, which will assume responsibility for the program in 2025. It is estimated that 110,000 children will benefit from the program.

IMPROVING STUDENTS' VISION IN MEXICO

Portable Diagnostic Sets Allow for In-School Vision Screenings

GRANTEE: Fundación Ver Bien para Aprender Mejor (See Well to Learn Better Foundation)

The grant allows Ver Bien to continue its important work of diagnosing and addressing vision issues in the estimated 13 percent of elementary and high school students in Mexico who suffer from refractive error. In addition to funding eye exams and prescription glasses for students, the grant will allow for the replacement of old, worn portable diagnostic sets used by teams of optometrists to perform in-school exams during the 2023-24 academic year. An estimated 211,000 children will benefit during the time frame.

EXPANDING PEDIATRIC OPTOMETRY IN MOZAMBIQUE

Academic Training and Clinical Experience Will Result in More Services for Children

GRANTEE: Light for the World International

Since mid-2018, only one hospital in Mozambique has offered comprehensive pediatric eye care. Although optometry training offered at a public university in the country is helping to increase the number of optometrists available, the current training does not focus on children's eye care.

The grant will help address the training gap by providing an 8-week program for optometrists treating pediatric patients. The program will provide academic training and clinical experience (including equipment at two of Mozambique's three main referral hospitals with child eye health units.

Optometrists who undergo the training will have the opportunity to train others in the future, thus helping to ensure the sustainability of the nationwide program.

EXPANDING CLINICAL TRAINING CAPABILITIES IN GHANA

New Hospital Branch to Enable Students to Learn While Serving the Community

GRANTEE: Operation Eyesight (Watborg Eye Services)

The grant is being used to establish a branch of Watborg Eye Services in Accra City Centre to provide primary, secondary and tertiary care to an estimated 4,000 low-income patients, in the first year alone, who otherwise would have to travel a long way to the central region of the country for eye care.

Additionally, the facility will serve as a clinical training site for optometry students from Kwame Nkrumah University of Science and Technology and University of Cape Coast. Funding of the project will facilitate the sustained future growth of optometric and vision care services in Ghana.

TEACHERS ARE FRONTLINE VISION SCREENERS IN ZAMBIA

Students Receive Exams, Eyeglasses and Follow-Up Care

GRANTEE: Operation Eyesight

In conjunction with Zambia's Ministry of General Education, Operation Eyesight continues its work to provide free exams, eyeglasses and vision care to children in Zambian schools. Through this program, the organization trains school teachers in primary eye care screening strategies to identify children with visual impairment.

Through local, national and international partnerships, students are provided with eye exams and custom prescription eyeglasses if necessary and are referred for additional diagnostics and treatment if required. Being able to see well means that students are much more likely to be successful in school and in life.

IMPROVING ACCESS TO EYE CARE IN THE DOMINICAN REPUBLIC

More Than 135,000 Dominicans to Receive Exams and Necessary Care

GRANTEE: Restoring Vision

Optometry Giving Sight continues to support this expanding program in which students from the Dominican Republic's School of Optometry, in conjunction with Restoring Vision staff, travel to each province of the country to provide vision screenings and eyeglasses to people of all ages who need them. By the end of the grant year, 135,000 people with presbyopia and myopia will have received the vital care they need to improve their daily lives.

PROVIDING VISION CARE FOR JAMAICAN STUDENTS

Training and Added School Partnerships Help Jamaican Children See

GRANTEE: See Better. Learn Better Jamaica

In Jamaica, the public healthcare system does not provide access to refractive care. There is only one optometrist for every 165,000 residents, leaving the country's population with little access to eye exams, eyeglasses and other corrective measures. This is especially true of western Jamaica, a rural area that is far from the urbanized areas of Montego Bay and Kingston, where healthcare services are more readily available.

In 2015, the See Better. Learn Better initiative began providing long-term eye care free of charge for young students through partnerships with local schools. During its seven-year history (the initiative was on hiatus during the COVID years of 2021 and 2022) the organization has provided annual eye exams and prescription glasses, if necessary, to more than 8,500 students ages three to 12. If their prescription changes or their growing bodies require new eyeglass frames, they will receive new ones at no cost through their first six years of school.

The grant is being used to include three additional schools to the See Better. Learn Better initiative, which will result in vital eye care services for an additional 1,200 to 1,500 students this year. A portion of the grant will also be used to establish an optometry care program at the area's closest referral hospital, Bustamente Children's Hospital in Kingston. Through this effort, the organization will serve approximately 500 pediatric patients this year who have been referred to the hospital for follow-up diagnostics and treatment.

Considering that 80 percent of a student's learning is vision based, this initiative is truly changing the lives of students and building a stronger, more hopeful future for the country of Jamaica.

INSTITUTE WILL ADD TO NUMBER OF OPTOMETRISTS IN NEPAL

Local Residents Will Gain Access to Vital Eye Care Services

GRANTEE: Seva Foundation

Although there are three optometric training programs in Nepal, there is not one in Madhesh Province, the country's most densely populated province with more than 6.1 million residents. In total, approximately 73 students graduate each year with a bachelor's or master's degree in optometry.

Currently, there are 250 optometrists registered with the Nepal Optometry Society, only some of whom practice within the country.

The grant provides funding for the Seva Foundation to work with the Government of Nepal and a hospital in Madhesh to establish an optometry training instute whose students and faculty will provide vital vision exams and eyeglasses to residents of the province – individuals whose circumstances prevent them from traveling to other areas of the country for eye care.

When fully operational, the institute will graduate 10 optometrists per year, helping the country achieve its goal of having approximately 583 practicing optometrists within its borders.

OPTOMETRIST TRAINING FOR SPECIAL OLYMPICS ATHLETES

Expanding Training for Treating Individuals with Intellectual Disabilities

GRANTEE: Special Olympics

Optometry Giving Sight continues to support Special Olympics and its athletes by providing this grant for an ongoing program to expand training for eye care practitioners and optometry students about treating individuals with intellectual disabilities. In 2022 – in Kenya and the U.S. combined – 1,185 eye care practitioners and 176 optometry students participated in hands-on, live online or asynchronous online training. And 3,258 Special Olympics athletes were provided vision screenings as well as eyeglasses, sports glasses and referrals as necessary.

BANGLADESHIS CONTINUE TO BENEFIT FROM VISION CENTER SERVICES

Teachers Learn to Spot Vision Impairment in Students

GRANTEE: Symbiosis Foundation

Since 2006, the Symbiosis Foundation has been operating its SPECS (Symbiosis Primary Eye Care Service) Program in rural and remote areas of Bangladesh. During that time, the Foundation has established eight vision centers throughout the country to provide eye exams, glasses and referral services to disadvantaged residents.

The grant will be used to fund the continuing operations of the centers, which are expected to serve 45,000 patients, 30,000 of whom are children. Recognizing the tremendous value of educating communities about eye care, the Foundation will also use the grant to conduct eye health training for 15,000 individuals. Among these will be 200 teachers, who will learn how to identify possible vision impairment issues among their students.

REPLACEMENT EQUIPMENT TO BOOST CAPACITY IN MEXICO CLINIC

Refurbished Exam Rooms to Serve Up to 1,000 Patients Per Screening Event

GRANTEE: The Guerrero Crystal Foundation, Inc.

In Mexico, 61 percent of the population suffers from vision impairment. And, 40 percent of them also have mobility challenges due to poor eye care.

In the state of Chihuahua, the Guerrero Clinic has provided free eye care for 40 years to the indigent Mexicans, Mennonites and Tarahumara Indians in the state and surrounding area. Much of the care – including ocular health seminars, eye exams, glasses, cataract surgery, and retinal procedures – is provided by volunteer optometrists and optometry students.

Only three of the eight exam rooms at the clinic are used due to a lack of usable equipment, which severely limits the number of patients who can be seen during the numerous clinics held throughout the year.

The grant will be used to replace the equipment in

five of the exam lanes and to replace the 20-year-old edger used to make eyeglasses. Refurbishing the rooms will increase the capacity of the clinic to serve 1,000 individuals during each clinic.

FREESTANDING VISION CENTER TO SERVE REMOTE AREA OF UGANDA

Scholarships Will Build Optometry's Presence in Bwindi

GRANTEE: The Hope Alliance

In Uganda, seven percent of the population suffers from moderate to severe vision impairment. Yet, there is a severe shortage of eye care services due to the lack of facilities and trained professionals.There is only one ophthalmologist in the country for every 1.5 million residents. Many individuals surrounding the remote town of Bwindi – impoverished members of indigenous groups – must walk hours daily to collect water and firewood. And, access to basic health services are often a day's walk away or longer.

The Bwindi Community Hospital has converted a 273-square-foot shipping container into a makeshift eye care center for the 120,000 citizens of the area. But its small size, limited equipment, and scarcity of optometry professionals meet only a small percentage of the need.

The Hope Alliance, in conjunction with hospital leadership and other partners, will help build a free-standing vision center to expand and improve the eye care services available to the community. The grant from Optometry Giving Sight will be used to: create scholarships for optometry and ophthalmic tech students; furnish the clinic with the necessary equipment to diagnose, treat and refer patients and; provide support to the hospital in creating a sustainable business model to ensure the clinic's short-term and long-term success and growth.

OPTOMETRY TRAINING IN HAITI CONTINUES

More Optometrists Result in Better Care for Those in Need

GRANTEE: Université de Montréal

With only seven optometrists to serve the 11 million people of Haiti, OGS and partnering organizations helped establish the Haiti School of Optometry in 2017. In addition to the school, the partners established an Academic Vision Center to improve optometric training and care for local residents.

Since that time, OGS has continued to support the project, whose 5-year program now includes approximately 60 students. Despite numerous setbacks including safety and security issues, political instability and lack of robust technology, the University is scheduled to graduate its first group of optometrists soon. But, there is addional work to be completed before this can occur.

The grant from OGS is being used to support the continued development of the school in partnership with the Université de Montréal, Brien Holden Foundation and Université d'Etat d'Hai.

BUILDING THE CAPACITY OF OPTOMETRY ASSOCIATIONS

Expanding Professional Development in Ethiopia, Ghana and Zambia

GRANTEE: Vision Action

Ongoing continuing education is paramount to maintaining knowledge, skills and professional certification and registration with the goal of improved patient care. Yet, for optometrists in Ethiopia, Ghana and Zambia, professional development opportunities are hard to find and/or access.

Although each country has its own national optometric association, (OA) all are at varying stages of organizational development. The grant will enable the associations, in conjunction with Vision Action and other partners, to increase their capacity to better serve their members through a variety of strategic and operational activities.

From helping raise awareness about the vital role of optometry in public health, to conducting strategic

planning, and establishing ongoing continuing education programs, the grant will help elevate the level of professionalism of optometry in the countries and, ultimately, improve the quality of optometric care for patients.

PRIMARY CARE OPTOMETRY EDUCATION IN GUATEMALA

Advanced Training Will Result in Better Care for Nation's Poor

GRANTEE: Vision for the Poor

The Guatemala National Eye Care Plan calls for ending treatable blindness in the country by 2032. Efforts to meet this ambitious goal have included the establishment of ten vision centers and three regional eye hospitals. Two more vision centers are under construction.

A wide range of optometric services are readily available in the country to people who can afford it. But, the poorest of the nation's residents do not have easy access – or any access at all – to eye care professionals who can provide the full range of diagnostic, prescriptive and treatment care that they need. There is only one organization within Guatemala providing these services to impoverished communities. However, its optometrists are trained only to perform refractions and prescribe eyeglasses or other visual aids.

Vision for the Poor will use the grant in partnership with other organizaons to offer advanced education to 18 optometrists so they can serve as primary care optometrists trained to recognize, diagnose and treat more complex cases. Currently, patients with these issues must be referred to one of the limited number of ophthalmologists available who work with members of impoverished communities in Guatemala. A portion of the grant will also be used to establish six new outreach teams to provide vision care services within the community-at-large.

SERVING AND LEARNING

Professional Development and Direct Vision Care Will Have Global Impact

GRANTEE: VOSH International, Inc.

The partnership between VOSH International and Optometry Giving Sight is long-standing. Both organizations exist to eliminate preventable blindness and vision impairment throughout the world by introducing and strengthening the profession of optometry where it is most needed.

The grant will be used in various locations globally to support the continuing sustainable development of eye care services via education and optometric service. By providing training, networking, mentorship and patient care, the grant will positively impact VOSH chapters and members and the people they serve wherever they are.

LEADING OPTOMETRY FORWARD

Course Offered on Leadership and Advocacy

GRANTEE: World Council of Optometry

Optometry Giving Sight's mission is to end preventable blindness and vision impairment by developing and strengthening the optometry profession worldwide. Throughout the organization's history, OGS has worked with partners to create sustainable education programs globally whose students and graduates serve the communies in which they learn and live.

But, as optometry takes its place in developing countries, there is a new demand for leaders in the field who can shepherd the profession's growth and strengthen its role in adopting standards of care, creating professional development, provide robust advocacy and effectively lead the industry forward. As a result of this need, the World Council of Optometry has created the OPAL Program: Optometry Program for Advocacy Leadership. The grant from OGS will fund the delivery and implementation of this year's OPAL Program, a 12-week course that provides participants with information, materials, and knowledge in order to identify and strengthen personal leadership skills and develop and implement an optometry advocacy program. This is the second year for the annual course.

SUPPORTING THE GROWTH OF OPTOMETRY IN VIETNAM

Ten years ago, only three qualified optometrists were practicing in Vietnam. However, efforts to expand optometry in the country, supported by Optometry Giving Sight (OGS), have resulted in the graduation of hundreds of optometry students, as well as eye care for thousands of Vietnamese residents.

The need for access to eye care in Vietnam is significant, with the International Agency for the Prevention of Blindness estimating that 14.2 percent of the country's population are in need of optometry services. That amounts to more than 14 million individuals who need eye exams and other primary optometry care. Optometry Giving Sight and its partner organizations became involved.

In 2015, a partnership between OGS, the Brien Holden Foundation, and Hanoi Medical University (HMU) resulted in the establishment of the Pediatric Refractive Error Training Centre (PRETC) in Hanoi. During the previous year, an Optometry Department was established at University of Medicine Pham Ngoc Thach. But, the PRETC represented the first optometry school in the country.

Since the programs' inceptions, more than 380 students have become optometrists and have provid-ed eye care to approximately 10,000 patients and an additional 300,000 individuals via extensive community outreach programs. In 2023, there were 337 students enrolled in both programs.

Providing free or low-cost eye exams and eyeglasses helps meet some of the immediate need for vision care in the country and is an important part of the work that OGS and its partners do in Vietnam. But, like all OGS projects funded, there is a focus on scalability and sustainability of programs.

Because of this commitment to sustainability, OGS and its partners' work with the Vietnamese government resulted in optometry being recognized as a credentialed profession in the country. This was an important step forward in ensuring that vision care in the country is accessible not only today, but well into the future.

GIVING SIGHT TO STUDENTS IN JAMAICA

"Justin Did It!"

This exclamation by six-year-old Justin's teacher marked a milestone in the young boy's school life. Undiagnosed vision impairment had made school very difficult for Justin. But, on this day, Justin received much-deserved accolades from his teacher for an assignment well done.

Thanks to a program funded in part by donations to Optometry Giving Sight, Justin can look forward to many more days like this. Through the OGS-funded See Better. Learn Better Program, Justin and hundreds of other primary school students in Jamaica receive free annual eye-exams and prescription glasses. If their prescriptions change or their growing bodies require new eyeglass frames, they receive new ones at no cost through their first six years of school.

The program also trains volunteers in basic optometry skills, and works with optometry students to train them to work with children. Through a new partnership with a local hospital, they are increasing the capacity of other eye care professionals to provide services for children suffering from unnecessary refractive error.

Eye Care Caribbean estimates that 2,589 school-aged children (five through 12 years old) in Jamaica are either blind or vision impaired. Yet, the organization also estimates that there is only one optometrist per 150,000 residents of the island.

That's why OGS is committed to programs such as See Better. Learn Better. The program not only addresses the immediate need for eye care on the island, but is expanding optometry to improve access to eye care for the long-term.

Considering that 80 percent of learning is visually-based, OGS and See Better. Learn Better are making a world of difference for the school children of Jamaica. It's the difference between a life lived on the sidelines and a life fully lived. For Justin and others like him, the future is looking bright.

IN UGANDA, BUILDING A VISION CENTER AND EXPANDING OPTOMETRY

In Uganda, seven percent of the population suffers from moderate to severe vision impairment. Yet, there is a significant shortage of eye care services due to the lack of facilities and trained professionals. A grant from Optometry Giving Sight helped establish the country's first optometry training program at Makerere University. The first cohort of students graduated from the program in 2019.

Since that time, OGS has continued to support projects in Uganda that expand optometry and increase the access to eye care services for its residents. Its most recent grant was awarded to the Hope Alliance in 2023 to help build and furnish a vision clinic in the remote town of Bwindi.

The remoteness of the town means that residents – impoverished members of indigenous groups – must walk hours daily to collect water and firewood. Access to basic health services is often a day's walk away or longer.

To help meet the immediate, short-term need, Bwindi Community Hospital converted a 273-square-foot shipping container into a makeshift eye care center for the 120,000 citizens of the area. But its small size, limited equipment, and scarcity of optometry professionals meet only a small percentage of the need. The larger, permanent clinic will enable more residents to be served. But, in the meantime, those who can be helped at the temporary center are happy to have vision care nearby.

When resident Lillian Joy received her first pair of glasses at the center, she related that it was a "special moment," and looked forward to returning to weaving, reading, and attending church with her friends and family, where she can now join in reading her bible. Once the permanent vision clinic opens, Lillian Joy and other residents will have long-needed primary vision care services permanently close to home.

With the building of a permanent eye care center, there will be an even greater need for optometry professionals in Bwindi. So a portion of the OGS grant is being used to fund scholarships for local individuals to receive training at nearby hospitals and schools.

One scholarship recipient is Justus Tusiimegye, a young man who grew up nearby as the oldest of eight children. While working at the hospital, Justus volunteered to help during a hospital-based vision screening. He learned about visual acuity screening and dispensing positive and negative spheres. Justus also served as a translator for members of his community, enabling them to communicate with doctors and other members of the team to receive vision care services and the most appropriate glasses for their vision needs.

As a result of his experience with the Hope Alliance, Justus has a deep desire to further his education and help his community. With the assistance of OGS, Justus recently begun his studies as an optometry technician at Ruharo Mission Hospital, Eye Centre in Mbarara, Uganda.

OGS EARNS 4-Star Rating FROM CHARITY NAVIGATOR

We're excited to share that Optometry Giving Sight was evaluated in 2023 by Charity Navigator, the world's largest and most trusted nonprofit evaluator, and earned a Four-Star Rating! This is the highest possible rating on Charity Navigator.

Charity Navigator analyzed OGS on four key indicators including

- Impact & Results
- Accountability & Finance
- Culture & Community
- Leadership & Adaptability

We are so proud to have achieved this milestone that validates operational excellence in non-profits throughout the world!

We thank you for your continued support of the work we do to eliminate preventable vision impairment and blindness. We know you have choices to make regarding charitable contributions, and we thank you for placing your trust in us to help give the gift of sight throughout the world. Thank you for being an integral part of our mission!

OPTOMETRY GIVING SIGHT
world sight day challenge
ESTABLISHED 2007

JOIN US for the World Sight Day Challenge

The annual World Sight Day Challenge is Optometry Giving Sight's biggest fundraiser. And 2023 was no different. Optometry practices, vision care companies and students from optometry schools throughout the United States and Canada continued to show their passion for helping others by hosting a variety of fund-raising activities that resulted in donations to OGS.

We thank everyone who participated in 2023 and look forward to a successful 2024 World Sight Day Challenge!

September and October 2024
givingsight.org/wsdc

ABOUT WORLD SIGHT DAY

1.2 billion people worldwide lack access to basic, life-changing eye care—but the gift of sight is one that we can give together. World Sight Day is an annual day of awareness supported by eye health organizations around the world to draw global attention to vision impairment and to raise funds to combat them. World Sight Day 2024 will be celebrated on Thursday, October 10.

THE WORLD SIGHT DAY CHALLENGE

While World Sight Day is a single day, the World Sight Day Challenge runs throughout September & October to help underserved individuals get the eye care services they need. The World Sight Day Challenge is Optometry Giving Sight's largest annual fundraiser, bringing the global optometric community together to eradicate uncorrected refractive error by giving the gift of sight to families around the world.

RAISE FUNDS FOR THE WORLD SIGHT DAY CHALLENGE!

Create a personal and/or team fundraising page to share on social media and by email. Invite patients, students, colleagues, friends, family, and followers to join you in raising money for OGS. Together, you will be helping give sight to people in need around the world. Set a goal, write a short message, and receive a link to share. Other fun ways to generate support include:

- Bake Sales
- Raffles
- "Dining in the Dark" Event
- Silent Auction
- Fun Run
- Jeans and T-Shirt Days

Combined US/Canada operations; Canada funds converted to US$ at 12/31/2024

WE THANK YOU

Optometry Giving Sight is grateful to our major corporate partners across the United States and Canada. They help make it possible for us to support global projects that train local eye care professionals, establish vision centers and deliver eye care and glasses to under-served people and communities around the world. To all of our company and corporate donors, we say thank you for giving sight and hope!
